

- 1 Sydney Water collects and stores drinking water in their reservoirs.
- 2 Sydney Water distribute potable water to each property.
- 3 Wilton Recycled Water (WRW) takes all waste from the sewer and transport to the plant.
- 4 WRW treatment plant produces recycled water.
- 5 WRW distribute the recycled water around Bingara (for toilet flushing, irrigation and some washing machines).
- 6 Excess recycled water is stored in a dam.
- 7 The excess recycled water is taken from the dam to irrigate the golf course.
